

# HTML Fundamentals

This is a sample syllabus. Actual course topics and assignments may vary by instructor and class.

---

## DAY ONE:

### GETTING STARTED

- Planning a site
- Organizing and naming your site files and directories
- Understanding markup – HTML elements, attributes, and values

### COLOR AND TEXT BLOCKS

- Working with “Hex” colors (see link at end of this document)
- Applying color to a web page
- Working with text: Headers, paragraphs, line breaks
- Divisions and Spans
- Comments

### BASIC FORMATTING

- Text size and formatting
- How CSS (style sheets) format text

### HYPERLINKS

- Linking web pages together, relative vs. absolute links
- Link color, email links
- Using anchors to link to specific spots on a page
- Opening linked pages in separate browser windows
- Using CSS (style sheets) to format link text

## DAY TWO:

### WORKING WITH IMAGES

- Choosing a format (JPEG, GIF, PNG)
- Image attributes – width, height, “alt text”, align
- Using images as links; background images
- Transparency

### TABLES

- Creating a table and using tables to control page layout
- Pros and cons of using tables vs. CSS for layout
- Formatting tables – colors, backgrounds, borders, size, spacing

### PUTTING YOUR SITE ON THE WEB

- Finding a host and registering a domain name
- Transferring files to the host server
