

A Natural Classic: Grange

How can something so sublimely classic at the same time be so *au courant*? Known for its great care in updating heirloom styles to contemporary tastes and uses, Grange references its rich history of classic French design while maintaining its deep-rooted emphasis on artisan craftsmanship. With equal care, the company's commitment to the environment ensures that Grange is forever

green, using wood from reforested trees and water-based paints and varnishes, while reducing factory emissions. The ShopAD site, which launches internationally this month, shares a host of world-class Grange products, including the New Directoire Table, Harlequin Chest and Napoleon Chair featured here. Each reflects Grange's profound global awareness—and perennial global appeal.
