

Team Sales made simple

Hello,

My company, TeamUniformOrders.com (TUU), recently joined Sports, Inc. I wanted to introduce myself and let you know about TUO.

Team sales and management has never been **easier** with TUO's system—it gives all of your customers their own online store. With TUO, you'll do 80% less work—I am NOT EXAGGERATING. Plus, you'll have opportunities for marketing to your customers that amount to a **NEW REVENUE STREAM**.

All the spreadsheets, misplaced forms, and last minute ordering will be a thing of the past when you implement this system.

Your customers will **love** the system too—No more painstaking compilation of forms, collecting money or scrambling for missing player orders. Every detail of every order is available on a single screen or a few mouse clicks away, in comprehensive reports.

We've already gotten started with members of Sports, Inc. and the potential for success is obvious. You and other group members can realize as much as a 30% increase in profits. The system works! Don't just take my word for it—talk to your colleagues about how TUO has made their team ordering business **EASIER** and **MORE PROFITABLE**.

TUO costs absolutely nothing to get started—no set-up fees, recurring fees, or monthly minimums! We charge a small percentage of revenue. Our special rate to Sports, Inc. members is the lowest one we offer—your group is a priority. That's all the more reason to take advantage of TUO's system and start transforming your team ordering business.

We are going to be at the **Sports Inc Show in Vegas, November 21 and 22**. I'd like to meet you there so I can tell you more about TUO and show you exactly how this system will mean **LESS work** and **MORE profit** for your business. Please call or e-mail me to schedule a time when we can talk at the show.

Best regards,

Dave Thomas
President
