

Managing today
for a better
tomorrow.

Creating, growing and preserving substantial wealth is a complex process that cannot occur quickly or easily. It requires constant vigilance, a nurturing, watchful eye, and a keen sense of timing to detect and anticipate market cycles.

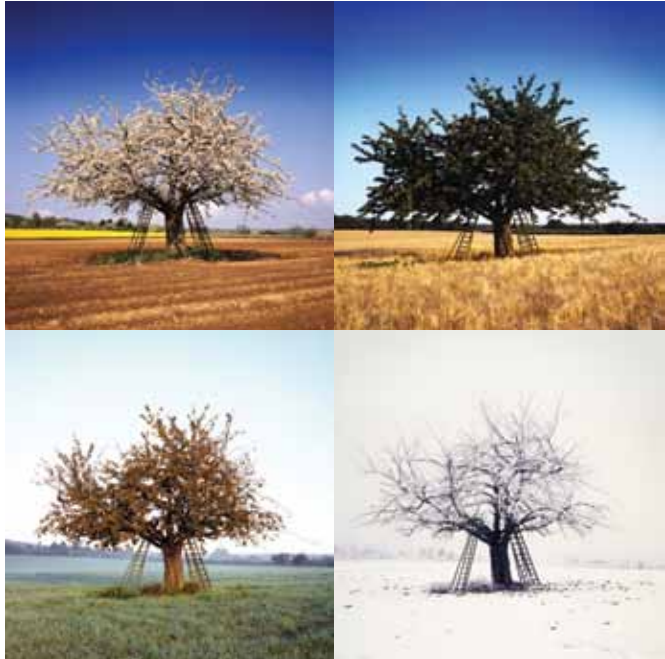

BENCHMARK TREND ANALYSIS is
MRK | *Asset Management's* proprietary
investment process, which combines
fundamental and technical market analysis
with a quarter-century of experience—
strategically positioning portfolio assets
for optimal long-term growth and reward.

By carefully monitoring market cycles, and analyzing industry sector trends, we manage clients' portfolios to take advantage of market fluctuations, seeking superior results and a greater cumulative rate of return, based on a clients' personal portfolio strategy.

Cycles are part of nature. We may seek to preserve assets by moving them to a cash position, thereby potentially avoiding the results of drastic downturns in the market. Our actions are rooted in a thorough understanding of each client's individual lifestyle, investment perspective and overall goals and aspirations.

At MRK | *Asset Management*, our mission is to work with and serve clients over time, to build and grow beneficial portfolios, one rung after another, seeking optimal rates of return in a tax-efficient manner, season after season, year after year.

We make the fruits of your labor serve you.
