

Customer Link Exchange with **AcuSport**

Celerant has partnered with AcuSport to offer their CustomerLink™ Exchange, which allows for two-way communication with AcuSport. Stratus Retail point-of-sale allows retailers to import vendor catalogs, including product descriptions and images, eliminating the need to manually enter data. With AcuSport's CustomerLink™ Exchange, retailers can then automate purchase orders to AcuSport by utilizing the min/max settings within the Stratus POS system. Sales data can then automatically be shared with AcuSport to help change the industry by making the supply chain more efficient.
