Easton Pool & Spa Named Top Builder in the Nation

Easton Pool & Spa was honored once again this year on the Pool & Spa News Magazine list of the nation's top 50 builders. Candidates for this award are considered based on several factors including: staffing practices, social media presence, community service involvement, website strength, and residential construction revenue. Easton Pool & Spa was the proud recipient of two additional awards which landed them ranked in the top ten among the top 50 companies in the country for both social media excellence and outstanding website design.

The magazine also recognized Easton Pool & Spa's lead project manager, Mike Santel, with an MVP tribute: an employee whose contribution, hard work and dedication directly impacted the company's success in serving customers and earning a spot on the Top 50. Mike heads up the Easton Pool & Spa team as general manager for staff as well as lead service tech and project manager. He is a customer favorite when it comes to customer service excellence and positive feedback.

Easton Pool & Spa owner, Dave Hobaica, said: "We have been fortunate enough to win several awards and distinctions over our 40-plus years in business. The Top-50 Builder distinction, however, is an award of which we are especially proud. This is due to the fact that the award is about much more than annual revenue and the number of pools built. The fact that the judging also weighs community involvement, employee retention, and customer service levels, validates all of the hard work that we have put in building our business and our reputation for excellent service."

About Easton Pool & Spa:

Easton Pool & Spa is a family-owned, full-service award-winning company headquartered in Easton, MA with seasonal retail stores in Easton and Walpole. With decades of experience, the team Easton Pool & Spa is one of the largest in-ground pool companies in the area and provides complete project management and exceptional service to its clients for all of their existing pool needs, new construction projects and everything in between. Easton Pool & Spa employs state-of-the-art technologies in pool construction to supply clients with all of their outdoor needs: pool design, permitting, site work, electrical, plumbing, fencing, decking, and landscaping.
