

# POCKET-SIZED SWING FIX

By **SCOTT KRAMER**

The latest fixes to your game require neither pros nor lessons, but rather a smartphone and a little tech savvy. These products transform your smartphone or tablet into an instant full swing analyzer, replete with thorough data about how you swing your woods and irons, plus amazing real-time animation. Check 'em out!

**Swingbyte** weighs less than an ounce, and attaches to the club shaft just below the grip. Swing the club, and as you make impact with the ball, the sensor transmits a digitized version of your swing via Bluetooth to your phone, which displays clubhead speed, clubface angle, and more. \$149 (includes one year of service); [swingbyte.com](http://swingbyte.com)

**NewSpin Golf's SwingSmart** revolutionizes how you see your swing. Its sensor clips to your club shaft and instantly relays a 3-D graphic visual of your swing, along with all pertinent swing data, to the screen of your iPad or iPhone. It also archives every swing. \$300; [swingsmart.com](http://swingsmart.com)

**Zepp's GolfSense** attaches to your glove's Velcro strap. Take a swing and the sensor relays all of your pertinent swing data to your iPhone, iPad, or iPod touch with 3-D analysis. You can also access tips for improvement, share your swing on Facebook or by email, and see side-by-side comparisons of swings. \$129.95; [golfsense.me](http://golfsense.me)
