

Organic interpretations inspired from the natural world

Embracing old-world craftsmanship with rapid technology, the *Ouroboros* collection is an organic interpretation of complimentary concepts. Flowing seamlessly into a perfect meditation of never-ending creation, it draws inspiration from the delicate relationships between animals, plants, and the natural environment. Resonating as a constant celebration of nature, the essence of *Ouroboros* is a flawless and everlasting integration of functionality and design.

Stark monochromatic hues of the California desert are showcased in the *Dune* seating unit, as the flowing curves of sand dunes meld harmoniously with the matching rug's hypnotic snake pattern. From the mysterious *Stormy Night* mobile to the whimsical *Night Owl* Lamp, the *Ouroboros* collection strives to be enduring objects of life and energy, echoing the infinite beauty and layered sophistication of the natural world.

About Rick Lee Design: An innovator at the vanguard of modern design, Rick Lee combines rational thinking with radical influences to create minimalist pieces with deft whimsical touches. Working with a wide range of resources, Lee aptly describes his design approach as "California cuisine," a mix of seemingly incongruent ingredients carefully combined to create something new and unique.

After 15 years of multi-disciplinary exploration in San Francisco, Chicago, and Milan, Lee and his team currently design for major furniture manufacturers and independent clients. Garnering extensive accolades from the media, his work has also appeared in celebrity homes, movie productions, and international exhibitions. The *Ouroboros* collection is Lee's third independent production.
