

REACHING BEYOND THE RIVER

ACL is more than a transportation company, we are also a leading manufacturer of marine equipment. We reach beyond the river.

**Our Scope will Surprise You
Your Savings will too!**

The experience of shipping on the river since 1915

The power of a fleet of 2,500 barges and 120 tow boats

The support of nearly 3,000 employees

The flexibility to deliver exactly what you need

A Leader in Safety & Environment

- Environmentally friendly
- Barging is the safest mode of transportation
- ACL is the safest carrier in the industry

With unmatched unit capacity, moving cargo by barge is the lowest cost, cleanest and most fuel efficient method of shipping freight

1 barge load = 16 railcar loads = 70 truck loads

What we ship...

- Chemicals, petroleum, ethanol, edible oils
- Dry bulk and non-bulk grain, coal, steel, fertilizers, salt, ores, gypsum
- Project cargo, containers

More than just bulk shipments ...

- Covered, uncovered, and liquid tank barges
- Packages and containers
- Multi-modal terminal packages and storage facilities

Where we can take you ...

- Connect with rail and highway
- Warehouse and liquid tank storage
- Specialized terminals and more

AMERICAN COMMERCIAL LINES

LEMONT TERMINAL

Lemont, IL • 502-415-3731

Located 25 miles southwest of downtown Chicago, this terminal provides bulk, non-bulk, and break-bulk warehousing and stevedoring services. This facility features a climate controlled, 48,000 square foot warehouse with potential for expansion. Convenient truck access to Illinois, Indiana, Michigan, and Wisconsin, and U.S. Inland Waterway access to Mexico, Texas, Louisiana, Alabama, Florida, Pennsylvania and points in between, make this terminal a powerful multi-modal resource.

ST. LOUIS TERMINAL

St. Louis, MO • 800-638-2134

This facility is designed specifically for the transloading of coal from railcars onto barge for multi-modal delivery to coal utility plants. Served by the Burlington Northern Santa Fe Railway, it is a key facility for the transfer of Powder River Basin coal to large volume users in the Midwest, Southeast and export market. The terminal is on the Mississippi River and features a rotary dump house, belt scales, blending services and on-site storage.

MEMPHIS TERMINAL

Memphis, TN • 866-968-3636

ACL's liquid terminal, located within minutes of downtown Memphis, Tennessee, is strategically located with access to Interstates 55 and 40, and the Burlington Northern Santa Fe Railway. This facility specializes in liquid tank storage for third parties with 100,000 BBLS of storage tank capacity. It caters to diverse liquid cargoes including chemical, petroleum, renewable fuels and vegetable oils, and offers services such as oil recycling, storage, waste water disposal, steaming and more.

1. ACL Knows Coal

- ACL is more than a leader in the management and execution of transporting coal by barge, we provide total logistics solutions for our energy customers.
- ACL loads an average of 14 barges of Powder River Basin coal per day at our Western Terminal, in St. Louis, and has the capability to load 24 barges per day.
- If awarded the Midwest Generation contract, ACL can use our St. Louis coal terminal as a model, integrating this expertise into the Lemont Facility.
- It is our publicly stated goal to increase our footprint in the coal sector.

2. Chicago Area Team & Facilities

- ACL has expanded its services in Chicago, at the newly refurbished Lemont facility.

ACL's St. Louis coal terminal can serve as model for a safe, effective solution for Midwest Generation's needs.

ACL's Chicago team is ready to develop customized solutions for energy customers.

- With over 120 tugboats and 2,500 barges in operation, ACL is ready to service Midwest Generations' requirements.
- The new ACL Lemont Terminal has the largest amount of fleet space, strategically positioned to serve the Chicago market.
- ACL Lemont operations (dispatch, fleet man-

agement, barge maintenance and sales) are uniquely positioned to offer Midwest Generation customized, quality service to execute the coal business plan.

3. Barge Maintenance You Can Trust

- ACL operates a dry dock in its Lemont fleet for timely service and repair.
- Burrows Barge, Midwest Generation's present barge repair service, is also ACL's preferred Chicago area third party barge repair service.
- ACL Barge Maintenance group is available to provide a thorough evaluation of each Midwest Generation barge, to compile a comprehensive list of recommendations for potential refurbishment of the individual barges.

4. The Capabilities of Summit Contracting

- ACL also offers the services of our joint venture environmental service company, Summit Contracting, which specializes in soil and groundwater remediation, industrial services, site development, utility installation, demolition, decontamination, 24-hour emergency spill response, high pressure media blasting and cutting, and more.

5. Partnering in Infrastructure Investment

- ACL can partner with Midwest Generation to design and create the facilities required for the seamless movement of your cargo.
