ECHO COLORADO
Extension for Community Health Outcomes

Make A Difference In Colorado's Health

Register Today
Connect, Engage, Learn & Share

ECHO Colorado
(Extension for Community Health Outcomes)
is a statewide program of training
and practice support to increase the
capacity to manage complex health care
problems in primary care settings and
to prevent disease in Colorado.

From your office or home

Each ECHO Colorado learning series is conducted online, using bi-directional video. Each series is multiple sessions connecting a panel of experts, a facilitator, and 10-20 participants.

Feedback from panelists

Each session includes a brief didactic presentation from a topic expert followed by facilitated case presentations from participants and panel discussion.

Active participation

ECHO Colorado is funded through a variety of partners. The only cost to learners is their commitment to participate in the sessions. Participants are expected to submit cases or experiences for discussion.

Improve Health Outcomes For Your Community And Your Patients

ECHO Colorado connects cohorts of learners to improve capacity for both clinical care and public health in Colorado.

ECHO Colorado is a live video-based training system that blends brief didactic presentations with case-based learning.

- Participate from your home or office
- Refresh on current best practices
- Receive CE credits
- Decrease unnecessary referrals

Robust curriculum

Curriculum typically consists of 1-2 sessions of 60-90 minutes per month, for 3-6 months.

Simple technology requirements

Today's smart phones, tablets, and many laptops come equipped with a built-in camera and mic. That is all that is required to participate in an ECHO Colorado learning series. Just click on the link we send you after you register.
